## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 claims trademarked solvents, which do not give any information about the contents of the solvent. Also, the contents of the trade marked solvents are subject to change by the manufacture without notice. Clarification can be achieved by claiming the predominant chemical composition in the trademarked solvents.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2,8,10 and 14-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kunderna et al.(USP 4,062,649).

Kunderna et al. teach a device comprising a paper substrate supporting a mixture of a pesticide, volatile solvent and an indicator to indicate the depletion of the pesticide and volatile solvent.

***Claim Rejections - 35 USC § 103***

Art Unit: 1743

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 3-7,9 and 11-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kunderna et al.

Art Unit: 1743

Kunderna et al. teach a device comprising a paper substrate supporting a mixture of a pesticide, volatile solvent and an indicator to indicate the depletion of the pesticide and volatile solvent.

Kunderna et al. are silent to the claimed insecticides, volatile solvents, indicators and retarder.

The court decided In re Boesch (205 USPQ 215) that optimization of a result effective variable is ordinarily within the skill of the art. A result effective variable is one that has well known and predictable results. The choice of an insecticide, volatile solvent, indicator and retarder to achieve the expected and known functions of killing insects, providing solvation, indication and control/retardation of the solvation respectively are all result effective variables.

It would have been within the skill of the art to modify Kunderna et al. and use a well known insecticide such as transfluthrin, vapothrin, permethrin, pyrethroid, prallethrin, tefluthrin or esbiothrin; a volatile solvent, such as heptane, methanol, acetone, ethanol, isopropyl alcohol, dodecene, tetrahydrofuran or toluamide; an indicator such as guaiazulene; and a retarder such as toluamide, hexadecane, tetradecane, transfluthrin, dodecene, vapothrin, permethrin, prallethrin, tefluthrin or esbiothrin as optimization of result effective variables.
